Projects

Enrich Salon Management (live) (GitHub)
Tech Stack – React, Node.js, Express.js, REST API, MongoDB, Razorpay, Nodemailer, Zod, React Charts, Material UI, Tailwind CSS
- Built a full-stack salon management platform using **React**, **Material UI, Node.js**, and **MongoDB**, enabling users to seamlessly book appointments, choose preferred dates/times, and make payments through **Razorpay integration**.
- Integrated **automated email notifications** for both customers and admins using **Nodemailer**, and ensured data integrity with **Zod** schema validation.
- Designed a feature-rich **admin panel** with secure authentication, complex data grids, and interactive charts for tracking sales, managing customers, and updating or adding new services, using tools like **React Charts, MUI Data Grid**, and **Tailwind CSS**.

Flick.AI (live) (GitHub)
Tech Stack – Next.js, TypeScript, Prisma, PostgreSQL, Google Gemini, NextAuth, Tailwind CSS
- Built an AI-powered tool using **Next.js** and **TypeScript** that refines tweets with a fine-tuned AI model tailored for Twitter.
- Integrated **Prisma** and **PostgreSQL** for a robust credit-based access system, allowing users to unlock additional features.
- Added functionalities like **direct Twitter sharing** and saving favourite tweets for future reference.
- Designed a sleek, responsive UI with **Tailwind CSS** and **S**hadcn UI to ensure an exceptional user experience.

GhostGram (live) (GitHub)
Tech Stack – Next.js, TypeScript, NextAuth, Google Gemini, MongoDB, Nodemailer, Magic UI, Tailwind CSS
- Developed an anonymous message platform using **Next.js** enabling users to send anonymous messages via unique shareable link.
- Integrated **Gemini** API for personalized message suggestions, increasing user engagement by approximately 30%.
- Secured user authentication with **NextAuth**, including E-Mail verification via **Nodemailer**, achieving 100% compliance with authentication standards.

The Chat Haven (live) (GitHub)
Tech Stack – Next.js, TypeScript, Node.js, WebSockets, Express.js, Tailwind CSS
- Developed a real-time chat application allowing users to **create/join** rooms via unique codes and chat instantly.
- Implemented **WebSocket-based** messaging for seamless real-time communication.
- Designed an intuitive and responsive interface using **Next.js** and **Tailwind CSS**.
- Ensure secure and scalable backend functionality with **Node.js** and **Express.js**.

Experience

Full Stack Development Teaching Assistant   *February 15, 2024 – July 1, 2024*
Stealth Startup
- **Mentored over 5,000 students**, providing individualized and group support, assisting with complex web development concepts.
- **Resolved more than 500+ coding issues,** enhancing students understanding of the MERN stack and increasing doubt resolution efficiency by 20%.
- **Achieved an average rating of 4.75** for effective teaching and personalized assistant, leading to improved student performance and satisfaction.

Skills

Languages:	TypeScript, JavaScript, C++
Frameworks/Libraries:	Next.js, React.js, Node.js, WebSocket, Express.js, Redux, Tailwind CSS
Tools/Software:	Docker, AWS, Turborepo, Git, GitHub, Linux, Postman
Databases and ORM:	Prisma, MongoDB, PostgreSQL, MySQL, Supabase

Education

Bachelors of Computer Application, University of Kota   *August 2025 (Expected)*
CGPA: 8.5

Achievements

- **Textify: Adobe-Funded Add-On for Adobe Express**
  Funded by Adobe, developed an image-to-text extraction tool within Adobe Express to streamline workflows.
- A certified Full Stack Developer with expertise in building real world projects.
- Solved over 500+ DSA problems on different coding platforms.
